**The Maksimal Series™ is redefining how the industry thinks about HFFS and is turning the “accepted” way of doing things on its side!**

**Once again, The Aagard Group is *REDEFINING THE STANDARD™***

**Run Thinner Films:** The Maksimal Series™ successfully runs film that no other HFFS machine can. The film is transported at a lower, continuous rate while laying flat during sealing. The seals are made with independent sealing stations resulting in material print requirements that are far less stringent than on traditional machines.

***Bottom Line: Save money on your film***

**Run Faster:** Continuous motion forming, filling, and sealing adds significant speed gains compared to the intermittent machines currently available on the market. Maksimal™ allows you to design the package you need without worrying about the limitations associated with the “duplex” and “triplex” approaches used by others.

***Bottom Line: Run bigger pouches faster***

**Reconfigure in the Field:** Aagard’s innovative approach to modularity and the control of the machine has resulted in a system that is easy to service and reconfigure as required. We know that product life and packaging style can be dynamic so we make it as easy as possible to reconfigure your Aagard equipment and reutilize it.

***Bottom Line: Great Performance, Open Options***

3711 Iowa Street • Alexandria, MN 56308 • Phone 320.763.6043 • [www.aagard.com](http://www.aagard.com)

**More Filling time:** Funnels that travel with the pouches provides significantly more time to get products into the pouch than on single point fill machines.

***Bottom Line: Run tough products others can't***

## **ABOUT AAGARD**

The Aagard Group, LLC, designs, engineers and manufactures automated packaging machinery in Alexandria, Minnesota. Our work force of creative, highly skilled and experienced employees establishes a workplace that allows us to bring to you imaginative, intuitive and efficient machinery of the highest quality. Aagard designs meet and adapt to your evolving equipment requirements.

Aagard is redefining the standard in Case Packers, Cartoners, Slevvers, Retort Loading/Unloading, Combination Equipment, Knock Down, Wrap Around, Trays, Shelf Ready Retail, Flexible Packaging and Harness.
